- Communication

PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER | BLACK FOX METAVERSE

October- 2023 – Present

- Collaborated as a frontend development effort for Dodas (Discovery Of Digital Assets) Project, collaborating crossfunctionally to develop a robust search engine for digital assets and calendar events, while also overseeing the project's administrative panel.
- Significantly contributed to enhancing search functionalities and user experience within Dodas Project, focusing on intuitive navigation and efficient asset management.
- Played a pivotal role in the BFM Location Project, concentrating on tailored location-based search features for diverse working professionals and developed BFM Location's seller section, providing professionals with a platform to showcase their services and connect with potential clients.
- Delivered features to improve user connections with relevant professionals based on location and specific requirements and collaborated with designers and backend developers to ensure seamless integration of frontend components.
- Demonstrated proficiency in Next.js, delivering user-centric frontend solutions with advanced features and functionalities.
- Actively participated in project planning, contributing valuable insights to enhance frontend development processes.
- Utilized agile methodologies for iterative development and continuous improvement of frontend features and maintained transparent communication channels, fostering effective collaboration.
- Ensured timely delivery of frontend deliverables, thereby contributing to project success and stakeholder satisfaction. Stayed updated on the latest frontend trends and best practices, driving innovation and excellence in project execution.

PROJECTS

KOALATALE APP | BACKEND AND FRONTEND
March 2024 – April 2024

- Created a collaborative platform for writers, fostering community engagement through story contributions, feedback and integration.
- Utilized Node.js for backend development, enabling efficient data management and user collaboration features.
- Implemented intuitive frontend interfaces using Flutter and Next.js, empowering writers to interact seamlessly.

AGRITECH PROJECT | MERN STACK October
2023 – October 2023

- Developed Agritech during a 3-day hackathon, aiming to mitigate profit loss for farmers due to intermediary intervention.
- Executed a Market Place platform to ensure equitable benefits, promote best agricultural practices, and mitigate weather-related risks.

REALTIME CHAT APPLICATION (SAYIN) | MERN STACK
May 2022 – May 2022

- Engineered a real-time chat application using the MERN stack, enabling instant group and one-on-one conversations.
- Provided users with seamless communication experiences through real-time messaging functionalities and scalable architecture.

NEWS APPLICATION (QUILLFEED) | FLUTTER January
2024 – January 2024

- Crafted a news application using Flutter, seamlessly integrating web view and API fetching functionalities for an engaging mobile experience.
- Demonstrated proficiency in intuitive application design and functionality implementation, enhancing user browsing experiences.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science (Hons)

Jaipur National University,
September 2020 – June 2024

- Specialization in Artificial Intelligence and Machine Learning
- Currently Pursuing

Intermediate Degree

 Sarvodaya Bal Vidyalaya, New Delhi,
July 2017 – May 2019

- Intermediate Degree from CBSE Board
- Percentage: 72%
