Professional Summary

Flutter, Node.js, and Agentic AI developer with 2+ years of experience building scalable, real-time, cross-platform applications using clean architecture and SOLID principles. Shipped apps serving 10K+ users, mentored junior developers, and build LLM-powered agentic systems (tool calling, RAG, MCP) alongside AI-assisted development workflows. Focused on developer productivity and software that works at scale.

Technical Skills

Mobile: Flutter, Dart, Provider, Riverpod, Bloc, Clean Architecture, SOLID Principles, Cross-Platform Development

Backend: Node.js, Express.js, REST APIs, API Management, Socket.io, WebSockets, JWT Authentication, Rate Limiting

Frontend: React, Next.js, Vue.js, JavaScript, HTML, CSS, Responsive Design

Databases: MongoDB, Mongoose ORM, Schema Design, Query Optimization

Agentic AI & LLMs: Agentic AI, AI Agents, LLM Integration, Tool/Function Calling, RAG, Model Context Protocol (MCP), Multi-Agent Workflows, Prompt & Context Engineering, Vector Databases

AI-Assisted Dev & Tools: Claude Code, Cursor, GitHub Copilot, CLI Tooling, Git, Agile/Scrum, Automated Testing

Professional Experience

iSkylar Technologies — Jaipur, Rajasthan, India
Full-Stack Mobile Application Developer — *Aug 2025 – Feb 2026*

- Architected and developed cross-platform mobile applications using Flutter with Node.js backends serving 10K+ users.
- Implemented real-time features with Socket.io for instant data synchronization across devices.
- Designed scalable MongoDB schemas with Mongoose ORM, improving query performance by 40%.
- Built RESTful APIs with comprehensive error handling, authentication, and rate limiting.
- Leveraged AI coding agents and LLM tooling to accelerate prototyping, debugging, and code reviews while delivering features on tight Agile deadlines.

K2K IT Support & Solutions Pvt Ltd — Jaipur, Rajasthan, India
Flutter Developer — *Dec 2024 – Aug 2025*

- Developed feature-rich Flutter applications following clean architecture principles and SOLID design patterns.
- Integrated third-party APIs and implemented state management using Provider, Riverpod, and Bloc.
- Reduced app crash rate by 60% through comprehensive error handling and automated testing.
- Trained and mentored junior developers on Flutter best practices, code reviews, and effective use of AI tools in daily development.

Black Fox Metaverse — Delhi, India
Frontend Developer — *Oct 2023 – Jun 2024*

- Built responsive web applications using React and Next.js with modern UI/UX principles.
- Collaborated with backend teams to design efficient API contracts and data models.

Projects

- **Agentic AI Personal Assistant** (in progress) – Autonomous LLM-powered agent that plans multi-step tasks, calls external tools and APIs through function calling, and retains context using memory and RAG.
- **raw_cli & raw_lib_flutter** – CLI and Flutter library tools that cut development boilerplate and improve developer productivity.
- **Encrypted Chat App** – Fully encrypted real-time messaging app built with Flutter, Node.js, and Socket.io.
- **Real-Time Collaborative Writing Platform** – Multi-user document editor with live sync, similar to Google Docs.
- **AgriTech App for Farmers** – Hackathon-winning mobile application built for the farming community.

Education

Jaipur National University — 2020 – 2024
Bachelor of Technology in Artificial Intelligence
